December 2020 - Today

- Designing logos, banners, flyers, brochures, business cards, etc. for small business companies.
- Creating websites for small business companies from start to finish using react.

Dear Sir/Madam,

I would like to apply for the position of Junior Web Developer in your company.

Although I don't have working experience as a Junior Web Developer, creating my own WebSite by following UDEMY courses helped me a lot to gain knowledge in the areas of Javascript, HTML, CSS...

I am very motivated to work and improve my knowledge and I believe that working in your organization will help me to achieve my professional goals.

I am interested in a full time job as well as an internship.

Best regards,

Mirko Miha Radenovic
